***Features information on all the pop singles and artists who have hit the Billboard charts since 1955. In The Spanish Monarchy and the Creation of the Viceroyalty of New Granada (1717-1739), Francisco A. Eissa-Barroso analyzes the politics behind the most salient Bourbon reform introduced in Spanish America during the early eighteenth century. "An up-to-date facing-page field guide to the birds of Puerto Rico and the Virgin Islands"-- Collection of articles or reprints from miscellaneous publications by various authors on milk cooperatives and cooperative creameries in the U.S. From the perspective of local scientists, this book provides insight into bees and bee management of Asia, with a special focus on honey bees. Asia is home to at least nine honey bee species, including the introduced European honey bee, Apis mellifera. Although A. mellifera and the native Asian honey bee, Apis cerana, are the most commonly employed species for commercial beekeeping, the remaining non-managed native honey bee species have important ecological and economic roles on the continent. Species distributions of most honey bee species***

**overlap in Southeast Asia, thus promoting the potential for interspecies transmission of pests and parasites, as well as their spread to other parts of the world by human translocation. Losses of managed *A. mellifera* colonies is of great concern around the world, including in Asia. Such global colony losses are believed to be caused, in part, by pests and parasites originating from Asia such as the mite *Varroa destructor*, the microsporidian *Nosema ceranae*, and several bee viruses. Taking advantage of the experience of leading regional bee researchers, this book provides insight into the current situation of bees and bee management in Asia. Recent introductions of honey bee parasites of Asian origin to other parts of the world ensures that the contents of this book are broadly relevant to bee scientists, researchers, government officials, and the general public around the world. The use of light-emitting proteins for the detection of biomolecules provides fast and sensitive methods which overcome the disadvantages of radioactive labels and the high cost of fluorescent dyes. This reference work summarizes modern advanced techniques and their applications and includes practical examples of assays based on photoproteins. The book presents contemporary key topics like luminescent marine organisms, DNA probes, reporter gene assays and photoproteins, ratiometric sensing, use of photoproteins for in vivo functional imaging and luminescent proteins in binding assays, to name just a few, and is complemented by recent advances in instrumentation. Includes an introductory chapter by 2008 Chemistry Nobel laureate Osamu Shimomura. A non-incorporated territory of the United States, Puerto Rico operates under U.S. legal, monetary, security and tariff systems. Despite sharing in these and other key U.S. institutions, Puerto Rico has experienced economic stagnation and large scale unemployment since the 1970s. The island's living standards are low by U.S. standards, with a per capita income only half that of Mississippi, the poorest state. While many studies have analyzed the fiscal implications of Puerto Rico's political relationship with the United States, little research has focused broadly on the island's economic experience or assessed its growth prospects. In this innovative new book, economists from U.S. and Puerto Rican institutions address a range of major policy issues affecting the island's economic development. To frame the current situation, the contributors begin by assessing Puerto Rico's past experience with various growth policies. They then analyze several reforms and new initiatives in labor, education, entrepreneurship, fiscal policy, migration, trade, and financing development, which they incorporate into a proposed strategy for jumpstarting Puerto Rican economic growth. Contributors include Gary Burtless (Brookings Institution); Orlando Sotomayor, Luis Rivera-Batiz, Ramón Cao, Maria Enchautequi, José Joaquín Villamil, Eileen Segarra, Marinés Aponte, and Juan Lara (University of Puerto Rico); Richard Freeman and Robert Lawrence (Harvard University); Helen Ladd (Duke University); Francisco Rivera-Batiz (Columbia University); Steven Davis and Bruce Meyer (University of Chicago); James Alm (Georgia State University); Ingo Walter, Rita Maldonado-Bear, and William Baumol (New York University); Belinda Reyes (University of California, Merced); Alan Krueger (Princeton University); Carlos Santiago (University of Wisconsin); David Audretsch (Indiana University); Ronald Fisher (Michigan State University); Fuat Andic (UN Advisor); Arturo Estrella (NY Federal Reserve); James**

**Hanson and Daniel Lederman (World Bank); James Dietz (University of California, Fullerton); and Katherine Terrell (University of Michigan). This book presents the current state-of-the-art in all major and upcoming areas of entrepreneurship research. Thousands of scholars around the world are currently working to broaden our understanding of the entrepreneurial phenomenon. The disciplines involved are numerous, as are the topics of interest, with substantial efforts to enhance the existing knowledge. This book is specifically designed to facilitate high-level, high-intensity discussions and fruitful exchanges between scholars involved in entrepreneurship research. The articles address a variety of topics ranging from self-employment, technology, growth patterns and job creation, and success and failure rates, to historical, conceptual and comparative international approaches. "This book takes entrepreneurship beyond the individual, size of the venture, entrepreneurial personality, and looks at entrepreneurship as a long term complex process that is heterogeneous, content dependent with an emphasis on innovation and growth. A must read for individuals interested in entrepreneurship, today and in the future, on a domestic and global basis." - Robert D. Hisrich, Director - Walker Center and Garvin Professor of Global Entrepreneurship, Thunderbird School of Global Management "Entrepreneurship is perhaps not just the most multifaceted but also the most important concept of the modern socio-economic disciplines. This book makes an invaluable contribution in this fascinating area: it presents a multifaceted socio-economic examination of the impact of entrepreneurship for growth." - Roy Thurik, Erasmus School of Economics in Rotterdam and Montpellier Business School his book is so powerful it will change your financial future even before you finish reading it! Most people struggle in life, especially when it comes to money and finances. They keep looking for ways to become rich but inevitably fail. What people fail to realise is that everyone is equipped with a unique monetary blueprint which is responsible for financial success or failure. It is this blueprint that causes some people like Bill Gates, Sir Richard Branson and L.N. Mittal to always be rich and successful. Through this book, you will learn their secrets: why such people get richer by the second and why others fail to be financially free. This book is a singular and powerful tool to help you understand and reprogramme your own financial blueprint in such a way that you will create wealth beyond your imagination! Internationally renowned Peak Performance Coach, Strategist and Ace Speaker, Arfeen Khan, through his second book *The Secret Millionaire Blueprint*, motivates you and teaches you how to attract wealth beyond your imagination. Foreword by Hrithik Roshan This book shows you: -The aecret psychology of wealth -How to think like a millionaire -How to use the millionaire s strategies of creating and maintaining wealth -How to boost the speed of your financial freedom -The 10 financial habits and behavioural traits of millionaires -The underlying cause of almost all financial problems and how you can correct them. -How to attract abundance and financial success. **IITians have teamed up to conjure 100 tips and tricks to crack the IIT. Their only mantra is 'Smart work will trump hard work'. It not only answers questions about all things physics, chemistry and maths but also addresses issues that students worry about and don't know whom to ask: Night owls vs early risers What does one do in class 11? Writing a formula 84 times to remember it Using WWE-style cards to make learning fun Colour-coded notebooks Getting the most out of lab experiments If tutorials and textbooks are professors, this book is that clever friend whom you meet outside the classroom and ask all your questions. Tells the tragic story of Puerto Ricans who sought the post-Civil War regime of citizenship, rights, and statehood but instead received racist imperial governance. When Hurricane María made landfall in Puerto Rico in September 2017, it left no part of the archipelago unscathed. The hurricane triggered floods and mudslides, washed out roads, destroyed tens of thousands of homes, farms, and businesses, caused the largest blackout in US history, knocked out communications, led to widespread food, drinking water, and gasoline shortages, and caused thousands of deaths. The seventeen oral histories collected in *Mi María: Surviving the Storm* share stories of surviving the storm and its long aftermath as people waited for relief and aid that rarely arrived. Zaira and her husband floated on a patched air mattress for sixteen hours while floodwaters rose around them. The road washed out in front of Emmanuel as he desperately tried to drive his pregnant wife who had begun labor to the hospital. Luis and his father anxiously counted the days that the dialysis clinic remained closed and lifesaving treatment was unavailable, while Miliana's mother was sent home from the hospital —undiagnosed— only to fall critically ill in her own home. Weaving together long-form oral histories and shorter testimonios, the book offers a multivocal peoples' history of disaster that fosters a greater understanding of the failures of governmental disaster response and the correlating perseverance of the people impacted by these failures, highlighting the colonial relationship between Puerto Rico and the United States. Ultimately, the ways in which these oral histories demonstrate the strength of community response to disaster in Puerto Rico are pertinent to other parts of the world that are being impacted by our current climate emergency. Eisenberg's book dealing with the Spanish Romances of chivalry, the most popular fiction of the Spanish Renaissance, and the preferred reading of *Don Quijote*, is finally back in print. Originally published in 1982, this important work has been out of print for a number of years. "Dan Eisenberg's work is our best source of knowledge about the Spanish romances of chivalry." -Sydney P. Cravens Texas Tech University "Daniel Eisenberg tiene un profundo conocimiento de los secretos de los libros de caballeros." -Martín de Riquer Real Academia Española**

**For human health, leishmaniasis is among the most important protozoan diseases, superseded only by malaria. Globally, 10 to 12 million people are infected with 1.5 million new cases every year. The development of cheaper new drugs is urgently needed for this neglected disease that is developing resistance to current treatments. Chemotherapy remains the only treatment option for the bulk of patients. However, this is largely unaffordable for most. In the past three years numerous advances in drug discovery have been made for treating this disease by exploiting diverging metabolic pathways between the *Leishmania* enzymes and their hosts,**

**using nanotechnology to target the immune cell phagolysosomes where Leishmania resides. Drug Discovery for Leishmaniasis aims to provide a perspective of the current treatments and their challenges, blended with the emerging strategies and methodologies that will drive new target appraisals and drug developments, as well as addressing the molecular basis of resistance in Leishmania. Recent studies have shown that leishmaniasis affects some of the poorest people in the world, with 95% of fatal cases occurring in only 6 countries. With the WHO goal of eliminating this public health problem in the South-east Asia Region by 2020, this book will be important for anyone who is interested in neglected tropical diseases. This Book of Abstracts is the main publication of the 71st Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming. "Early Economic Thought in Spain was published in 1978, and in her Foreword the author mentions that the discussion of long-term inflation in Spain from the sixteenth to the eighteenth centuries ought to be of interest since "we live in a time of inflation." The book can also be read as a history of Spanish responses to the decline of empire. At a number of points the author indicates that her study can be understood as a supplement to Joseph Schumpeter's History of Economic Analysis (1954). The chief contribution of this book is a review and summary of the development of economic thinking from the earliest days until about 1740 in one of the most important countries of Europe. Despite, or maybe because, Spain was in decline much of the last two centuries of this period, we are provided, as it were, with a ring-side seat for watching intellectuals come to terms with the forces behind such decline. Some of it, such as inflation, debt-financing, military over-extension, mercantilist protectionism, the preference of elites for their own economic benefit at the expense of the state, and more, will be familiar to readers who are familiar with the economic history of the last hundred years. If the distant mirror of history can help us avoid repeating the mistakes of the past, here is one place to find it. This book is dedicated to the memory of Leonard Ligio (1933-2014)"--**
