The Oil Trading Manual (OTM) provides a unique and comprehensive reference source to the latest developments in the structure and conduct of the international oil markets including: Physical characteristics and refining Oil pricing arrangements Physical oil markets Forward and futures contracts Options and swaps Operations and logistics Accounting and taxation Controlling financial risk Legal and regulatory control OTM provides a unique and comprehensive reference source to the structure and conduct of the international oil markets. The manual covers all the major oil trading instruments and their applications; the trading centres, contracts, uses and users of both the physical and the terminal oil markets, and their administrative, management, tax, and accounting implications. It also includes vital information on changes to the international legal and regulatory structures. The manual is divided into three complementary parts; Characteristics An introduction to oil and oil trading, and includes material on the nature of oil as a commodity, refinery processes and the different ways in which oil is priced. Instruments and markets Deals with the oil market itself taking each segment in turn, explaining how the

various trading instruments work and describing the markets that have evolved to trade them. It starts with the physical oil markets, moving on to forward and futures markets, followed by options and swaps. Administration Covers the essential 'back-room' activities without which oil trading could not continue. It includes practical material on operations and logistics, credit control, accounting, taxation, contracts and regulation, and controlling financial risk, providing a unique guide to the subject. Compiled from the contributions of a range of internationally respected professionals, it is the indispensable practical companion for all those involved with trading in this complex commodity. The 1995 National Household Education Survey (NHES:95) was a random digit dial telephone survey of households developed by the National Center for Education Statistics. The NHES:95 included two topical survey components: the Adult Education component, which collected information about adults' participation in adult education, and the Early Childhood Program Participation (ECPP) component, which collected information about children's participation in nonparental child care and early childhood programs. This manual provides documentation and guidance for users of the public release data file for the ECPP component. Information about the purpose of the study, the data collection instruments, the sample design, and data collection and data

processing procedures is provided. Some information about factors that should be kept in mind when using ECPP data is also provided. For the ECPP component, interviews were conducted with parents of 14,064 children, a figure that included 101 home schooled children. Four appendixes present screening and study questionnaires, information about the file layout, the Statistical Analysis System code for derived variables, and the ECPP codebook.
