The Role of the Nurse in Community Mental Health Feb 16 2020

The Role of Internal Competition in Knowledge Creation Jan 17 2020 This book is about how to implement creative competition within an organization. It examines the conditions under which internal competition can promote knowledge acquisition and knowledge sharing. The book describes a number of studies of sales departments in Japanese firms. Sales departments in Japanese firms were studied because internal competition is getting fiercer in these departments following the recent introduction of performance-based compensation. Exploratory case studies of ORIX Corporation and Japan Computer were conducted in order to generate research hypotheses. To gather quantitative data and test the hypotheses drawn from the case studies, a questionnaire survey of sales departments of Japanese firms listed on the Tokyo Stock Exchange was carried out. The findings reported in the book shed new light not only on internal competition theory, but also provide new insights into the theories on knowledge creation and intra-organizational conflict.

The Role of Community in Restorative Justice Oct 18 2022 Although restorative justice is probably one of the most talked about topics in contemporary criminology, little has been written about how community involvement in restorative justice translates into practice. While advocates have presented the community as an essential pillar of restorative justice, the rationale for why and how this is the case remains underdeveloped and largely unchallenged. This book offers an empirical and theoretical explanation of what 'community involvement' means and what work it does in restorative justice. Drawing on an empirical case study and the wider sociological literature, *The Role of Community in Restorative Justice* examines the involvement of the community in one selected practice of restorative justice and also considers the implications of the English and Welsh experience for development of a more coherent framework for operationalizing community involvement in restorative justice practices. It is argued that restorative justice programmes need to start from a more concrete and up-to-date notion of community. While operationalizing community involvement, they need to acknowledge, all at once: the importance of place; the importance of family links, friendship and other social ties; and the importance of similar social traits and identities. This book is essential reading for students, researchers and academics in the fields of criminology, criminal justice, sociology, community studies, policy studies, social policy and socio-legal studies. This book will also be valuable reading for a variety of practitioners and policymakers, particularly working with restorative justice and youth justice.

The Role of the EU in the Promotion of Human Rights and International Labour Standards in Its External Trade Relations Jun 21 2020

This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations, building on and stimulating

further - the already well-engaged - scientific dialogue on this area of research. In particular, it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and, in particular, for assessing the extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions. This book will appeal to research scholars, post-graduate students, practitioners and human rights activists.

The role of Guanxi in buyer-seller relationships in China Sep 05 2021 Using social, organisational and economic theories, this book develops an integrated research framework to demonstrate the effects of Chinese traditional guanxi networks on modern business relationships and market performance. It also compares the effects of guanxi networks between upstream and downstream partnerships and between traditional and high-value market outlets. It is recognised that quality and safety issues are the major constraints for Chinese vegetables entering into international markets. Primary producers face several bottlenecks such as small production scales, lack of market information and low negotiation power which leads to their exclusion by high-value market outlets such as supermarkets and international markets. Processing and exporting companies, on the other hand, experience instable delivery and inconsistent quality supply. As a result, they remain low-cost exporters in a low-quality segment of international markets. Different solutions for small-scale vegetable farmers, processing companies, exporting companies, and supermarkets in optimising their business performance are also covered. This book is of interest to professionals and practitioners involved in the design, management and assessment of national and international supply chains for perishable products in particular in transition economies.

The Role of the Poet in Early Societies Dec 20 2022 Bloomfield and Dunn describe the varying roles which "poets" have historically filled within society, whether ancient, medieval, or pre-modern and identify the key functions of the poet figure. He (or sometimes she) supports the ruler and is in turn rewarded for a central service to the tribe; he exercises his authority by an apparently magical understanding of the past, present, and future; and, whenever called upon to perform an official rite, he knows how to wield the appropriate traditional, esoteric utterances. In order to illustrate the ways in which this kind of poetic function can be seen to have been exercised in early Irish literature, pre-modern Scottish Gaelic, early Welsh, early Norse and Old English the authors draw on a wide-range of texts. The study concludes with an examination of the implications of their findings for twentieth century readers exploring the utterances of poets remote from them in time or space.

Inflation, Credibility, and the Role of the International Monetary Fund Nov 26 2020 This paper argues that many developing countries may find it difficult to buttress disinflation programs purely through the adoption of traditional credibility-enhancing devices (such as monetary anchors and central bank independence), owing to "technical problems" (for example, high instability of money demand, increased capital mobility) and an insufficient endowment of credibility in the political institutions. In these cases, borrowing credibility from an outside agency like the International Monetary Fund may be the most effective solution. The paper discusses the different options that would allow the Fund to support programs aimed not at external adjustment—the Fund's traditional role—but at disinflation.

Global Dialogue on the Role of Food and Agriculture in the Post-2020 Global Biodiversity Framework Sep 24 2020 The Global Dialogue on the Role of Food and Agriculture in the Post-2020 Global Biodiversity Framework was convened virtually by the Food and Agriculture Organization of the United Nations (FAO) and the Secretariat of the Convention on Biological Diversity (CBD) on 6 and 7 July 2021. This is the summary report of the meeting.

The Role of Digital Technologies in Shaping the Post-Pandemic World Apr 12 2022 This book constitutes the refereed proceedings of the 21st IFIP WG 6.11 Conference on e-Business, e-Services, and e-Society, I3E 2022, which took place Newcastle-upon-Tyne, UK, in September 2022. The 37 papers presented in this volume were carefully reviewed and selected from 72 submissions. They were organized in topical sections as follows:

Artificial intelligence; Data and Analytics; Careers and ICT; Digital Innovation and Transformation; Electronic Services; Health and Wellbeing; Pandemic; Privacy, Trust and Security.

New Challenges to the Role of Profit Oct 14 2019

Routledge Revivals: Economic Development and the Role of Women (1989) Aug 04 2021 First published in 1989, this book provides a macro-micro approach to economic development — taking account of multi-level linkages, both inter and intra, that had been missed by previous analyses. The author argues that these linkages demonstrate that social and economic change may occur from the "bottom up" household/family level and not just from the "top down" economic order level — using women as a vehicle to illustrate this. In the first section, the expansive body of development literature is summarised and critically reviewed — isolating the primary strengths and weaknesses. Case studies of Malaysia, the Chinese Commune and the Israeli Kibbutz demonstrate that a theory which combines the analysis of the organisation of work, kinship and ethnicity can accommodate the experience of women in an integrated manner that traditional development theory has failed to achieve.

Stories in Stone: Memorialization, the Creation of History and the Role of Preservation Dec 28 2020 In 1866, Alexander Dunlop, a free black living in Williamsburg Virginia, did three unusual things. He had an audience with the President of the United States, testified in front of the Joint Congressional Committee on Reconstruction, and he purchased a tombstone for his wife, Lucy Ann Dunlop. Purchases of this sort were rarities among Virginia's free black community—and this particular gravestone is made more significant by Dunlop's choice of words, his political advocacy, and the racialized rhetoric of the period. Carved by a pair of Richmond-based carvers, who like many other Southern monument makers, contributed to celebrating and mythologizing the "Lost Cause" in the wake of the Civil War, Lucy Ann's tombstone is a powerful statement of Dunlop's belief in the worth of all men and his hopes for the future. Buried in 1925 by the white members of a church congregation, and again in the 1960s by the Colonial Williamsburg Foundation, the tombstone was excavated in 2003. Analysis, conservation, and long-term interpretation were undertaken by the Foundation in partnership with the community of the First Baptist Church, a historically black church within which Alexander Dunlop was a leader. "Stories in Stone: Memorialization, the Creation of History and the Role of Preservation" examines the story of the tombstone through a blend of object biography and micro-historical approaches and contrasts it with other memory projects, like the remembrance of the Civil War dead. Data from a regional survey of nineteenth-century cemeteries, historical accounts, literary sources, and the visual arts are woven together to explore the agentive relationships between monuments, their commissioners, their creators and their viewers and the ways in which memory is created and contested and how this impacts the history we learn and preserve.

The Role of Independent Directors After Sarbanes-Oxley Jan 21 2023 This book is intended to provide independent directors and their advisors with an understanding of the primary legal and governance issues that have evolved in the corporate governance environment since the passage of the

Sarbanes-Oxley Act in 2002. The text on the accompanying CD-ROM sourcebook offers hypertext linked footnotes to direct lawyers (or interested non-lawyers) to legal source material.

International Perspectives on the Role of Technology in Humanizing Higher Education Nov 07 2021 By highlighting the use of emerging technologies in pedagogy and drawing on real-life case studies, the authors in this volume address the ongoing debate that technology brings a positive effect on education and beyond. They demonstrate how technology continues to fulfil the challenges of creating a more democratic educational environment.

The Role of the Autonomic Nervous System in Psychiatry Jun 02 2021 The Role of The Autonomic Nervous System in Psychiatry was published September 30, 2014, ISBN number: 978-0-578-13178-8. This book is written by a neuropsychiatrist in private practice (Jill Karatinos, M.D) to explore novel treatments for 18 complex patients. All patients have multiple psychiatric and medical diagnoses. This naturalistic study contrasts with academic clinical research in that the academic patients in randomized, placebo- controlled trials (RPCTs) are restricted to having only one diagnosis. This is rarely, if ever, encountered in clinical practice, where multiple diagnoses are the norm. Further, psychotherapy by the psychiatrist is included as part of the treatment here, whereas most psychotherapy nowadays is done by referral to psychologists or social workers. The second unusual feature of this book is the autonomic nervous system (ANS) as a focus of treatment. The ANS is the brain and peripheral neural circuitry governing involuntary physiology, such as blood pressure, heart rate, immunity, respiration, digestion, urination, sleep, pain, addiction, fatigue, and sexual and endocrine function. Although the book aims to share information with doctors and neuroscientists, an average person curious about abnormal mental conditions would also enjoy peeking into a psychiatrist's office to see what can be done for these patients.

[The Role of Public-Private Partnerships in Health Systems Strengthening](#) Jul 15 2022 Over the past several decades, the public and private sectors made significant investments in global health, leading to meaningful changes for many of the world's poor. These investments and the resulting progress are often concentrated in vertical health programs, such as child and maternal health, malaria, and HIV, where donors may have a strategic interest. Frequently, partnerships between donors and other stakeholders can coalesce on a specific topical area of expertise and interest. However, to sustain these successes and continue progress, there is a growing recognition of the need to strengthen health systems more broadly and build functional administrative and technical infrastructure that can support health services for all, improve the health of populations, increase the purchasing and earning power of consumers and workers, and advance global security. In June 2015, the National Academies of Sciences, Engineering, and Medicine held a workshop on the role of public-private partnerships (PPPs) in health systems strengthening. Participants examined a range of incentives, innovations, and opportunities for relevant sectors and stakeholders in strengthening health systems through partnerships; to explore lessons learned from previous and ongoing efforts with the goal of illuminating how to improve performance and outcomes going forward; and to discuss measuring the value and outcomes of investments and documenting success in partnerships focused on health systems strengthening. This report summarizes the presentations and discussions from the workshop.

Standardization: A Business Approach to the Role of National Standardization Organizations Feb 27 2021 This study fills a gap in standardization literature. It is the first academic analysis of national standardization organizations. These organizations exist in every country and may be private or governmental organizations. The first national standardization organizations were founded in the early decades of the 20 century and were aimed at rationalizing industrial production. Their mode of operation reflects the sense of co operation at the national level and - in the telecommunications and electrotechnical field - at the international level as well. Now, however, the scene has changed, with companies operating internationally. Standards for products, processes, and services are crucial factors in determining success or failure on a fiercely competitive market,

especially when functional compatibility is a prerequisite, as is the case in computer and telecommunications technologies. As a consequence, rather homogeneous needs of participants in standardization have given way to conflicting interests. This prompts a discussion about the traditional role of national standardization organizations. They increasingly depend on their exclusive links to the international standardization organizations ISO and IEC, and, in the case of Europe, the regional organizations CEN and CENELEC. In many cases, formal standardization organizations are not the obvious bodies for developing standards to meet business needs. Is this inevitable or could they improve performance and regain their market share? Henk de Vries answers this question against the background of current developments in standardization at the international, European, and national levels.

[The Role of Sisters in Women's Development](#) Nov 19 2022 Psychological theory has traditionally overlooked or minimized the role of siblings in development, focusing instead on parent-child attachment relationships. The importance of sisters has been even more marginalized. Sue A. Kuba explores this omission in *The Role of Sisters in Women's Development*, seeking to broaden and enrich current understanding of the psychology of women. This unique work is distinguished by Kuba's phenomenological method of research, rooted in a single prompt: "Tell me about your relationship with your sister." Rich in detail, the responses (many of which are reproduced at length within the book) provide a complex picture of sister relationships across the lifespan. Integrating these stories with current literature about gender and family composition for sisters of difference (disabled and lesbian sisters) and ethnic sisters, this book provides useful recommendations for therapeutic understanding of the significance of sisters in everyday life, integrating diverse perspectives in order to address the ways clinicians can enhance psychological work with women clients. A valuable contribution to the field of mental health, *The Role of Sisters in Women's Development* is highly recommended for therapists who wish to broaden their inquiry into the sister connection, as well as anyone who wants to further understand the importance of sisterhood.

Assessing the Role of Mobile Technologies and Distance Learning in Higher Education Oct 06 2021 In recent years, the use of information technologies, mobile devices, and social media, along with the evolving needs of students, professionals, and academics, has grown rapidly. New ways of bringing learning content to students, new learning environments, and new teaching practices are necessary to keep up with these changes. *Assessing the Role of Mobile Technologies and Distance Learning in Higher Education* provides a comprehensive understanding of m-learning processes by discussing challenges in higher education and the role of information technologies for effective learning. This reference book offers both real experiences and theoretical input for academicians, professionals, students, practitioners, policymakers, and managers.

The Role of I.T. Feb 22 2023 In light of the range of issues faced by teachers and students planning to develop information technology capability across the curriculum, Loveless (education, U. of Brighton) discusses reasons for using it in the classroom and focuses on the role of the teacher in understanding its purpose in the curriculum. She highlights how it can be used as a tool in dealing with information, as a resource for learning by giving insight into the nature of tasks; and as a thought provoker by contributing new ways of working for learners and teachers. Distributed in the US by Books International. Annotation copyrighted by Book News, Inc., Portland, OR

The Role of Protein and Amino Acids in Sustaining and Enhancing Performance Jan 29 2021 It is a commonly held belief that athletes, particularly body builders, have greater requirements for dietary protein than sedentary individuals. However, the evidence in support of this contention is controversial. This book is the latest in a series of publications designed to inform both civilian and military scientists and personnel about issues related to nutrition and military service. Among the many other stressors they experience, soldiers face unique nutritional demands

during combat. Of particular concern is the role that dietary protein might play in controlling muscle mass and strength, response to injury and infection, and cognitive performance. The first part of the book contains the committee's summary of the workshop, responses to the Army's questions, conclusions, and recommendations. The remainder of the book contains papers contributed by speakers at the workshop on such topics as, the effects of aging and hormones on regulation of muscle mass and function, alterations in protein metabolism due to the stress of injury or infection, the role of individual amino acids, the components of proteins, as neurotransmitters, hormones, and modulators of various physiological processes, and the efficacy and safety considerations associated with dietary supplements aimed at enhancing performance.

The Role of the Learner in Task-Based Language Teaching May 01 2021 This comprehensive, forward-looking text is the first holistic research overview and practical methods guide for researching the role that affective and conative factors play in second language learners' task performance and language acquisition. It provides a long overdue update on the role of the learner in task-based language teaching (TBLT). The book brings together theoretical background and major constructs, established and innovative methodological and technological tools, cutting-edge findings, and illuminating suggestions for future work. A group of expert scholars from around the world synthesize the state of the art, detail how to design and conduct empirical studies, and authoritatively set the agenda for future work in this critical, emerging area of language learning and instructional design. With a variety of helpful features like suggested research, discussion questions, and recommended further readings, this will be an invaluable resource to advanced students and researchers of second language acquisition, applied linguistics, psychology, education, and related areas.
