Monster Hunter Nov 19 2022 Billy is a monster hunter. That's because his home is infested with slimy, hairy, creeping, slithering, garbage-eating monsters! One week, Billy does battle with the monsters—in his bedroom, in the bathroom, even in the kitchen. But the problem is that monster hunting is a messy operation, and Billy's mom isn't so thrilled about all the messes she continues to find, whether it is water covering the floor, clothes thrown on the furniture, or food strewn about in the kitchen. So, when the hunting goes too far for Mom, Billy learns that monster hunting can—and must—be done with the proper tools. A vacuum or a rag with soapy water does wonders in defeating and cleaning up after a particularly troublesome Mud-Grass monster. With Billy's new monster-hunting techniques, he and Mom come to an agreement, and Halloween (and the house) is never the same again! Author and illustrator Justin LaRocca Hansen has created a fun and clever story that teaches children the importance of cleaning up after their messes. The whimsical illustrations of Billy happily fighting off his imaginative monsters will capture the attention of young readers, while reminding them to be responsible at home. A must-read for any special monster hunter you may know!

The Celestial Hunter Nov 14 2019 A New York Times Book Review Editors' Choice "[Calasso's] flow of associations leaves you feeling not out of your depth, but smarter and better read." --The New York Times Book Review The eighth part of Roberto Calasso's monumental series on the primal forces of civilization The eighth part of Roberto Calasso's singular work in progress that began in 1983 with *The Ruin of Kasch*, *The Celestial Hunter* is an inspired and provocative exploration of mankind's relationship with myth, the divine, and the idea of transformation. There was a time, even before prehistory, when man was simply a defenseless animal. The gods he worshiped took the form of other beasts or were the patterns of the stars he saw above him each night in the sky, which he transformed into figures and around which he created stories. Soon, however, man learned to imitate the animals that attacked him and he became a hunter. This transformation, Calasso posits, from defenseless victim to hunter was a key moment, the first step on man's ascendance to power. Suddenly the notion of the hunter became fundamental. It would be developed over thousands of years through the figures that became central to Greek mythology, including the constellations. Among them was Orion, the celestial hunter, and his dog, Sirius. Vivid and strikingly original, and expertly translated from the Italian by Richard Dixon, *The Celestial Hunter* traces how man created the divine myths that would become the cornerstones of Western civilization. As Calasso demonstrates, the repercussions of these ideas would echo through history, from Paleolithic to modern times. And they

would be the product of one thing: the human mind.

Greek Literature in Late Antiquity Sep 24 2020 Late Antiquity has attracted a significant amount of attention in recent years. As a historical period it has thus far been defined by the transformation of Roman institutions, the emergence of distinct religious cultures (Jewish, Christian, Islamic), and the transmission of ancient knowledge to medieval and early modern Europe. Despite all this, the study of late antique literary culture is still in its infancy, especially for the Greek and other eastern texts examined in this volume. The contributions here presented make new inroads into a rich literature notable above all for its flexibility and unparalleled creativity in combining multiple languages and literary traditions. The authors and

texts discussed include Philostratus, Eusebius of Caesarea, Nonnos of Panopolis, the important St Polyeuktos epigram, and numerous others. The volume makes use of a variety of interdisciplinary approaches in an attempt to provoke discussion on change (Dynamism), literary education (Didacticism), and reception studies (Classicism). The result is a study which highlights the erudition and literary sophistication characteristic of the period and brings questions of contextualization, linguistic association, and artistic imagination to bear on little-known or undervalued texts, without neglecting important evidence from material culture and social practices. With contributions by both established scholars and young innovators in the field of late antique studies, there is no work of comparable authority or scope currently available. This volume will stimulate further interest in a range of untapped texts from Late Antiquity.

Monster Hunter Nemesis May 01 2021 #5 in multiple New York Times bestseller Larry Correia's Monster Hunter series. Agent Franks of the U.S. Monster Control Bureau is a man of many parts^¾parts from other people, that is. Franks is

nearly seven feet tall and all muscle. He's nearly indestructible. Plus he's animated by a powerful alchemical substance and inhabited by a super-intelligent spirit more ancient than humanity itself. Good thing he's on our side. More or less. Sworn to serve and protect the United States of America from all monsters by one of the country's founding fathers, Franks has only one condition to the agreement: no matter what the government learns of him, no matter what is discovered concerning his odd physiology or the alchemy behind the elixir that made him, the government is never, ever allowed to try and make more like him. Such is absolutely forbidden and should the powers-that-be do so, then the agreement is null and void. Project Nemesis: in a secret location, using sophisticated technology and advanced genetic engineering, the director of the very agency Franks works for is making more like him. And the director is not content with making one. Nope, he's making thirteen. Now all bets are off, and Hell hath no fury like a monster betrayed. Particularly if that monster happens to be an undying killing machine capable of taking out vampires and werewolves with one hand tied behind his back. Sentience May 13 2022 Robots, sex, lies, adventure, and chaos. Who can you trust when you can't trust yourself? And what truly defines humanity and consciousness? Running from a violent past, Leo Knox desperately decides to participate in a scientific experiment conducted by the infamous and greedy tech-giant, AlgorithmOS. Soon, Leo learns that she has agreed to take part in a Turing Test, a test that measures the ability of artificial intelligence to blend in among humanity, but what she doesn't know is that the test set to take place is unlike any other of its kind. Leo enters Eden, the contained preserve where the test will occur, with twenty-three others. While everyone appears to be human, four of the individuals are an indistinguishably advanced form of humanoid AI. The task is simple: identify the AI while trying to survive. The twist? The four AI are completely unaware of their nature, causing every participant to question what they know as reality. The group embarks on a journey within the preserve, rigged with obstacles devised by the controllers of the experiment to elicit human response and emotion. Quickly, madness ensues and divides form, partnering Leo up with Avery Ford, a Marine who wears his demons on his sleeve. Romance falls together for the two as the world around them falls apart, revealing the lengths people will go to protect those they love, to achieve monetary gain, or simply to survive. Back at AlgorithmOS, the story unfolds on the screens of Nathan Aimes, a scientist responsible for monitoring the experiment's surveillance cameras. Nathan studies the humans involved as they wrestle with where they stand on the polarizing issue of AI and its applications. He watches the AI unknowingly fight to prove their humanity just to leave the experiment unscathed. All the while, Nathan is intimately aware of his company's plans to weaponize or commodify the AI should they pass the test, and he must

reconcile this with the chaos that plays out before him.
